How do I change my language and video caption preferences?

Last Modified on 08/17/2026 5:27 pm EDT

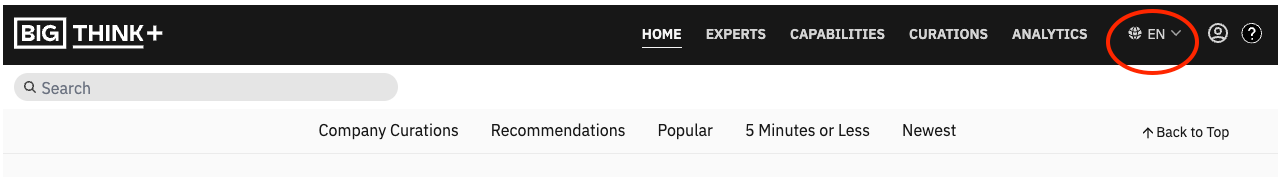

This article outlines how to set your preferred platform language and video captions for your Big Think+ account.

Translations are provided as a complementary feature for convenience and may not always be fully accurate; for precise wording, please refer to the original English content.

---

1. Locate the Language Menu

- Go to the **top right corner** of any Big Think+ page.
- You'll see a **globe icon** next to a two-letter label that indicates your current language (e.g., "EN" for English).

2. Open the Language Menu

- Click the language button to open a drop-down menu labeled **"Languages."**
- This menu shows all available **full platform translations**.
- Selecting a language here will:
  - Translate the entire platform interface.
  - Set your **default captions language** for videos.

3. Choose Your Platform Language

- Click on the language you want.
- The platform will automatically reload in your selected language.
- Any Learner Guides and Discussion Guides will also be downloaded in your chosen language.

4. Adjust Video Captions Separately (Optional)

- While watching a video, click the **settings gear** ⚙ in the video player.
- Under **"Captions"**, you can choose from **all 25 available languages** — even those not included in the platform-wide language list.
- If you change captions here, it will **override** the captions language set in the main language menu.
- **Note:** This change affects **captions only**; the platform language will not update.
