How do I search for or filter content?

Last Modified on 10/12/2026 6:01 pm EDT

This article explains how to use the search and filter features in Big Think+ to find content that fits your learning goals.

Looking for something specific? Search and filters help you find it fast.

Search

Type an expert, topic, or question into the search bar at the top of any page. For example: “Amy Edmondson,” “communication,” or “How can I have a tough conversation with my team?”

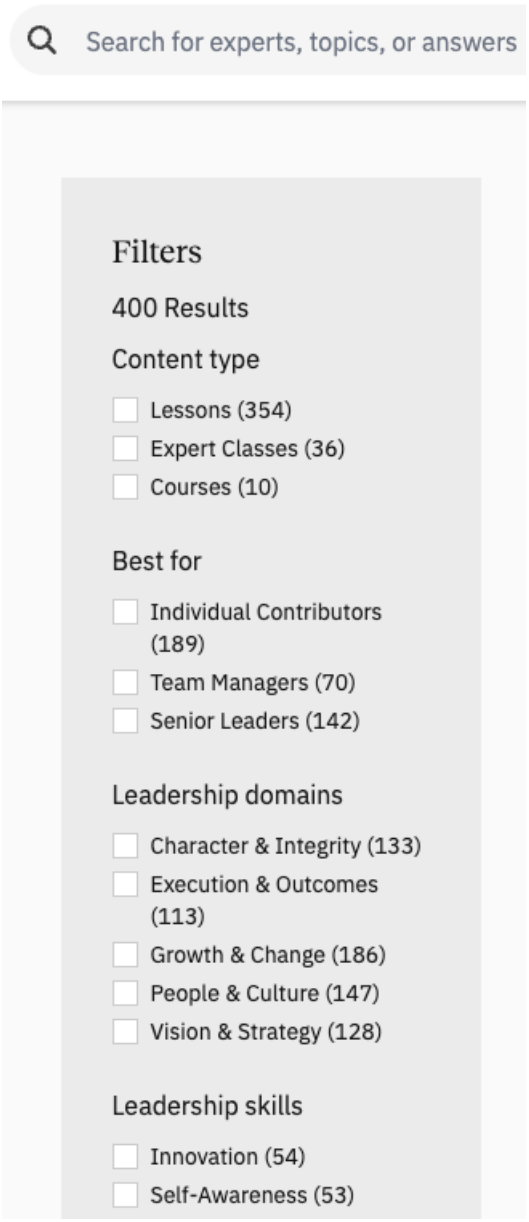

If your organization has AI Search turned on, full questions will also give you a short summary with lessons that answer them.

Filter your results

After you search, narrow your results with filters:

- **Content type:** Lessons, Expert Classes, or Courses
- **Best for:** Individual Contributors, Team Managers, or Senior Leaders
- **Leadership domains:** Broad areas from the BT+ Leadership Framework, like Character & Integrity
- **Leadership skills:** Specific skills within each domain, like Strategic Thinking
