How do I search for or filter content?

Last Modified on 08/10/2026 3:46 pm EDT

This article explains how to use the search and filter features in Big Think+ to find content that fits your learning goals.

Big Think+ includes a wide range of content, including Lessons, Courses, and Expert Classes. Whether you're looking for a specific topic or browsing for inspiration, the platform's built-in tools make it easy to discover content that matters to you.

Use the Search Bar to find specific content

1. Look for the **Search bar** at the top of most pages on the platform.
2. Type in an expert, topic, or question (e.g., "Amy Edmondson," "communication," or "How can I have a tough conversation with my team?").

Use filters to narrow your results

After you've searched for a topic, you can use one of the following filters to narrow down desired content:

- **Content Type:** Choose from Lessons, Expert Classes, Learning Paths, or Courses.
- **Best For:** Select your audience: Individual Contributors, Team Managers, or Senior Leaders.
- **Leadership Domains:** Filter by broader leadership categories like Character & Integrity.
- **Competencies:** Drill down further into specific focus areas (e.g., Strategic Thinking).
