BIG THINK +

# How should I get started learning?

Last Modified on 11/02/2026 6:50 pm EST

*This article walks you through your first steps on Big Think+ so you can start strong and personalize your learning experience from the start.*

Your browser does not support HTML5 video.

Once you've logged in, the best way to start is to make Big Think+ yours and then explore.

## Personalize your homepage

The first time you visit your homepage, you'll be asked how you want to grow. Click **Personalize my learning** and choose your role and the leadership skills you want to build. Big Think+ will use them to recommend content under **Personalized learning for you**. Learn more about choosing your role and skills.

## Jump into a lesson

Choose a topic that catches your eye. There are no wrong choices!

Your homepage is a good place to start. Scroll through the sections to find content from your organization in **Curations by [your organization]**, recommendations in **Personalized learning for you**, and what's new in **Newest Expert Classes**.

## Save what sparks your interest

If you find something interesting but don't have time to finish it, click the **+** icon on the lesson to add it to your **Watch Later** list. You'll find it anytime in your saved content.

## Record your thoughts

After watching, take a moment to reflect. Each lesson includes a Learner Guide to help you apply what you've learned, plus a private Notes section where you can jot down ideas or reminders.
