BIG THINK +

How do I personalize content based on my role and interests?

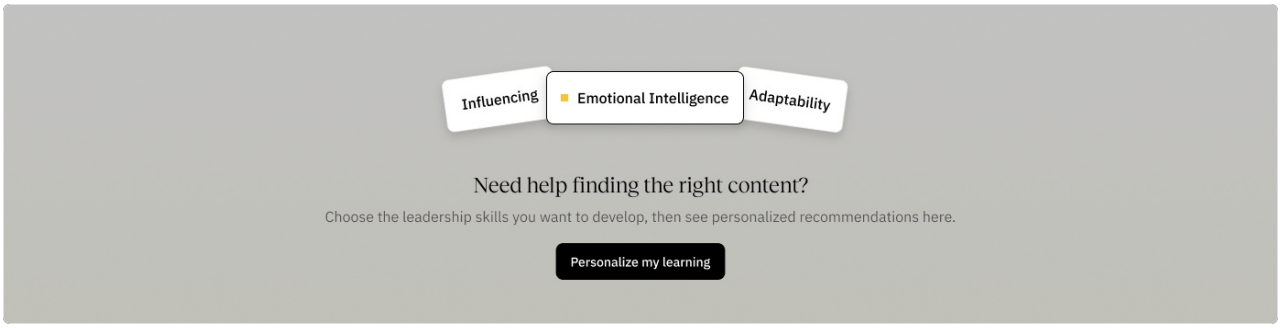

Last Modified on 11/02/2026 6:05 pm EST

This article explains how to pick your role and leadership skills to get personalized recommendations.

Big Think+ can recommend content based on your role and the leadership skills you want to build. It only takes a minute to set up.

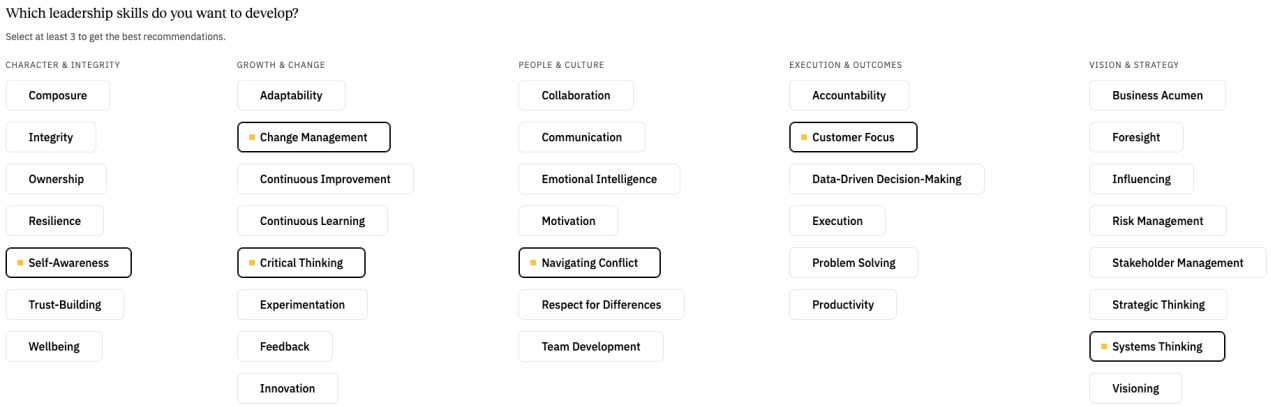

Getting started

The first time you visit your homepage, you'll see a prompt asking how you want to grow. Click **Personalize my learning** to open the selection page.

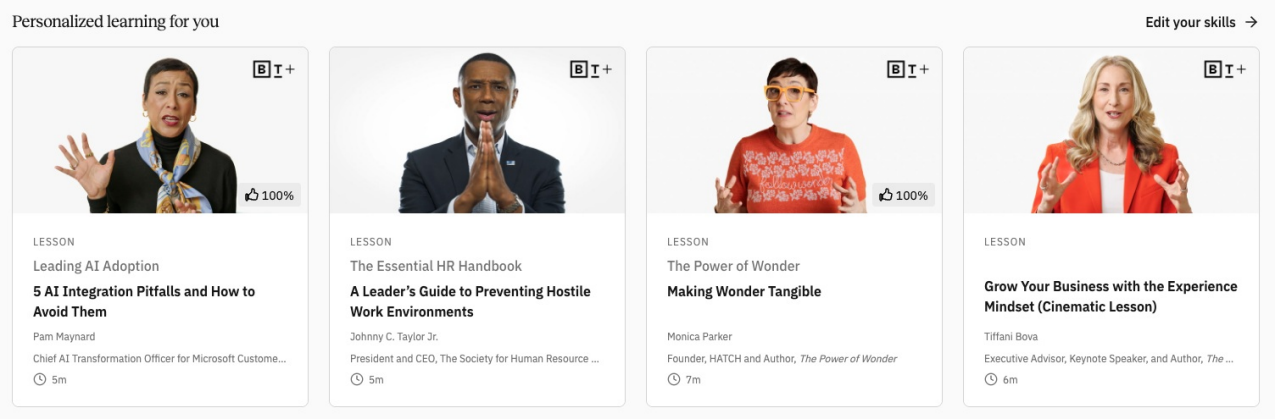

Start by choosing the role that best fits your day-to-day work: **Individual Contributor**, **Team Manager**, or **Senior Leader**.

Then pick the leadership skills you want to focus on. Skills are grouped by the five domains of the **BT+ Leadership Framework**. Choose at least three from any domain(s) you like. A few skills tied to what you're working on right now will give you the most relevant recommendations.

When you're done, click **Save**. You'll go back to your homepage, where your recommendations appear under **Personalized learning for you**.

Updating your choices

Your goals will change, so your skills can too. Click **Edit your skills** next to **Personalized learning for you** on your homepage to update your role or skills anytime.

If you skipped the prompt the first time, look for **Personalize my learning** on your homepage instead.

Don't see this? Your organization may not have it turned on yet. Ask your Learning Manager to contact Partner Services at ***partnerservices@bigthink.com****.*
