

How can I embed Big Think+ content into my leadership development programs?

Last Modified on 01/23/2026 1:34 pm EST

This article shares best practices for embedding Big Think+ content into a Leadership Development Program to make it impactful, relevant, and easy to adopt.

Embedding Big Think+ content into your existing leadership development programs works best when it's integrated with intention and planning.

Best Practices to Embed Big Think+ Content into your Leadership Development Programs

1. Align Content to Leadership Competencies

- Map Big Think+ Lessons, Expert Classes, and Courses to your leadership capability framework (e.g., Makes Sounds Business Decisions, Develops Others, Acts With Integrity).
- Use the [Capabilities](#) tab in the Big Think+ platform to easily find and match up content.

Example: Pair Adam Grant's "Give Effective Feedback" with a feedback module in a "Leading Others" program.

2. Use Big Think+ Lessons as Prework or Reflection

- Assign 1-2 Big Think+ videos before workshops, coaching sessions, or cohort meetups.
- Include discussion questions from Big Think+ [Discussion Guides](#) for reflection.

Why it works: Saves in-session time, deepens in-person engagement, and creates connections to personal experiences.

- NEW! [See some sample discussion decks](#) you can use for inspiration!

3. Create Facilitated Group Touchpoints

- Use Big Think+ [Discussion Guides](#) in small group cohorts, leadership circles, or team-based learning pods.
- Rotate facilitation among peers to encourage ownership.

Tip: Try launching a 30-minute “Lunch & Learn” once a month based on Big Think+ Lessons.

4. Blend Into Manager Toolkits and 1:1s

- Embed short videos in existing manager development toolkits or playbooks.
- Recommend specific videos to spark meaningful 1:1 conversations between managers and their teams.

Example: After performance reviews, have managers share *Amy Cuddy's "Self-Nudging for Progress"* with their teams to support feedback follow-through.

5. Layer Into Milestone Programs

- Integrate into new manager onboarding, high-potential programs, or executive development experiences.
- Assign curated playlists tailored to each transition point.

Sample Pathway for a New Manager Program covering leadership mindsets:

- Week 1: *Simon Sinek* - *"Become Responsible for the People Who Are Responsible for the Results"*
- Week 2: *Ryan Holiday* - *"Open Yourself Up to Learning"*
- Week 3: *Alisa Cohn* - *"Leadership Starts with You"*
- Week 4: *Linda Hill* - *"Manage Yourself"*

6. Promote Social and Peer Learning

- Encourage leaders to share their takeaways in team meetings, Slack channels, or internal blogs.
- Highlight leader spotlights or “Big Think+ Moments” in newsletters.

Why it works: Normalizes continuous learning in your culture.

7. Incorporate Into Learning Tech

- Embed Big Think+ into your LMS or LXP with clear learning pathways.

- Use any nudge or notification tools offered in your platforms to remind learners about new content or program offerings.
- Use single sign-on and auto-enroll to lower friction.

Tip: Tag content by skill, not just by speaker, to make searching easier. Ask your Account Manager for a listing of all Big Think+ content tags!

8. Use for Just-in-Time Development

- Recommend and share specific Lessons or Expert Classes in response to real-time team challenges.
- Managers or HRBPs can “prescribe” relevant Lessons to support individual coaching moments.

Example: Share *Cassandra Worthy's "A Leader's Guide to Strengthening Your Organization's Emotional Immune System"* when organizational changes are upcoming.
